Investing in Sustainability: A Global Necessity

The world urgently needs to invest over **\$5 trillion** annually in sustainability infrastructure for the next **15 years** to effectively combat **climate change** and **environmental degradation**.

Emerging Markets Investing Gap

There is a significant investing gap between developed economies and emerging markets, causing economic instability and limiting financial growth. For example, only 5% of people in emerging markets invest in financial markets, compared to over 25% in Western Europe and 50% in the US.

Web3 & Tokenization

More Inclusive, Efficient, and Transparent System for Trading Assets.

Web3 as a Financial
Platform

[RWA] Tokenization

Trillion-dollar
Opportunity

RWA tokenization is one of the most important practical applications of blockchain and cryptocurrency and is poised to revolutionize the global financial sector.

Web3 & Tokenization

Next Generation for Markets and the Future of Securities.

Cryptocurrency & Tokenization Regulation

Institutional Players Embracing Tokenization

BlackRock

FRANKLIN
TEMPLETON

Sachs**

SIEMENS

BlackRock CEO Larry Fink's:

“The next generation for markets, the next generation for securities, will be tokenization of securities.”

ReFi blockchain ecosystem specializing in tokenizing sustainability RWA assets to create stable and transparent sustainability-backed cryptocurrency.

The platform makes it possible to:

- Easily invest and trade in tokenized sustainability assets on Web3.
- Channel capital into sustainability projects.
- Promote innovative sustainability initiatives.

> Capital for Sustainability

Combat Climate Change
Creates jobs & Economic Opportunities

> Democratization of Investments

Increasing Financial Inclusion
Protecting Against Inflation

RWA Tokenization Launchpad

Web3 application designed for asset owners to streamline the tokenization and distribution process of their assets.

ReFi Cryptocurrency Marketplace

Marketplace to allow users to evaluate, invest, and trade investment opportunities in sustainability.

Web3 Distribution Framework

Framework to ensure tokenized assets are available across Web3 channels.

L1 Blockchain Platform

Smart-chain that can exchange assets and data with other blockchains without central exchanges.

Web2 Financial Platform

Enabling essential functionalities for traditional financial operations within established financial networks.

Cryptocurrencies dedicated to promoting sustainability

GGEZ1 Governance Coin

- **Governance Participation**
Allows coin holders to participate in the platform **governance**.
- **Validators**
To become a validator, entities must stake GGEZ1 coins as collateral.
- **Validation Rewards**
Validators who process transactions are rewarded for their participation in the consensus process, incentivizing network participation and increased security.
- **Fixed Coin Supply**
Maximum supply of **1,777,777,777 GGEZ1**.

GG ReFi Coin

- **Asset-backed**
Trusted, secure, and stable cryptocurrency
- **ReFi Investments**
Backed by a portfolio of diversified global **investments in sustainability**, the coin price reflects the **value of the underlying assets**; new coins get minted to meet user demands; there are **no supply limits**.
- **Staking**
Coin holders can stake their coins and **earn passive income**.
- **Store of Value**
Safe store of value with limited **price volatility** and **protection against inflation**.

BlackRock

BlackRock CEO Larry Fink says it best:
“The next generation for markets, the next generation for securities, will be tokenization of securities.”

[Next Generation Markets >](#)

BlackRock today unveils its first tokenized fund issued on a public blockchain, the BlackRock USD Institutional Digital Liquidity Fund (“BUIDL” or the “Fund”). BUIDL will provide qualified investors with the opportunity to earn U.S. dollar yields by subscribing to the Fund through Securitize Markets, LLC.

Competitive Advantage

1st to Market ME & AF

- ME & AF focused blockchain ecosystem.
- Allow us to establish strong brand recognition and customer loyalty before competitors enter the market.
- Additional time to perfect the product.

Blockchain Features & Interoperability

- Fast transaction processing: transactions are confirmed in under 7 seconds with a capacity to process 10,000 TPS.
- Low Cost Transactions: Fees are under \$0.01.

Sustainability Investments ROI

- Offer long-term financial returns and significant risk mitigation, making them financially attractive.
- Cryptocurrency promote trust and offer users a safe store of value, and protection against inflation.

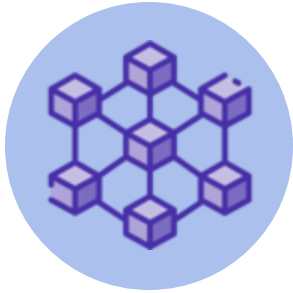

ReFi Approach to Investments

- Create sustainable and equitable financial system.
- Appeals to environmentally and socially conscious investors and end users, aligning with global trends towards responsible investing.

Why us

1. **We have extensive experience in fintech platform development (Founder/Market fit)**
 - We love to design and build applications ... we are builders, and we are building the GGEZ platform.
 - We have built fintech solutions for over 12 years with two successful fintech platform deployments.
2. **We have regional market experience with market insights**
 - Operating EVD platform since 2015 with 250 million USD annual revenue.
3. **No Public Blockchain from/to the ME&AF Region**
 - No major live blockchain ecosystem from the region and servicing the region.
 - To become the first widely adopted asset-backed cryptocurrency in the emerging markets ME/AF.
4. **Real-world assets are the most valuable asset**
 - People in our region value real world assets above any other asset class.
5. **Huge market opportunity**
 - Blockchain and Web3 framework opened a new market with potential for mass adoption.
 - ME&AF Market potential: 70m users with 300m USD in annual revenue.

Proof-of-Stake Layer 1 Blockchain

Interconnected & Decentralized

Freely exchange assets and data with leading blockchains and **without central exchanges.**

Fast & Low Fee Transactions

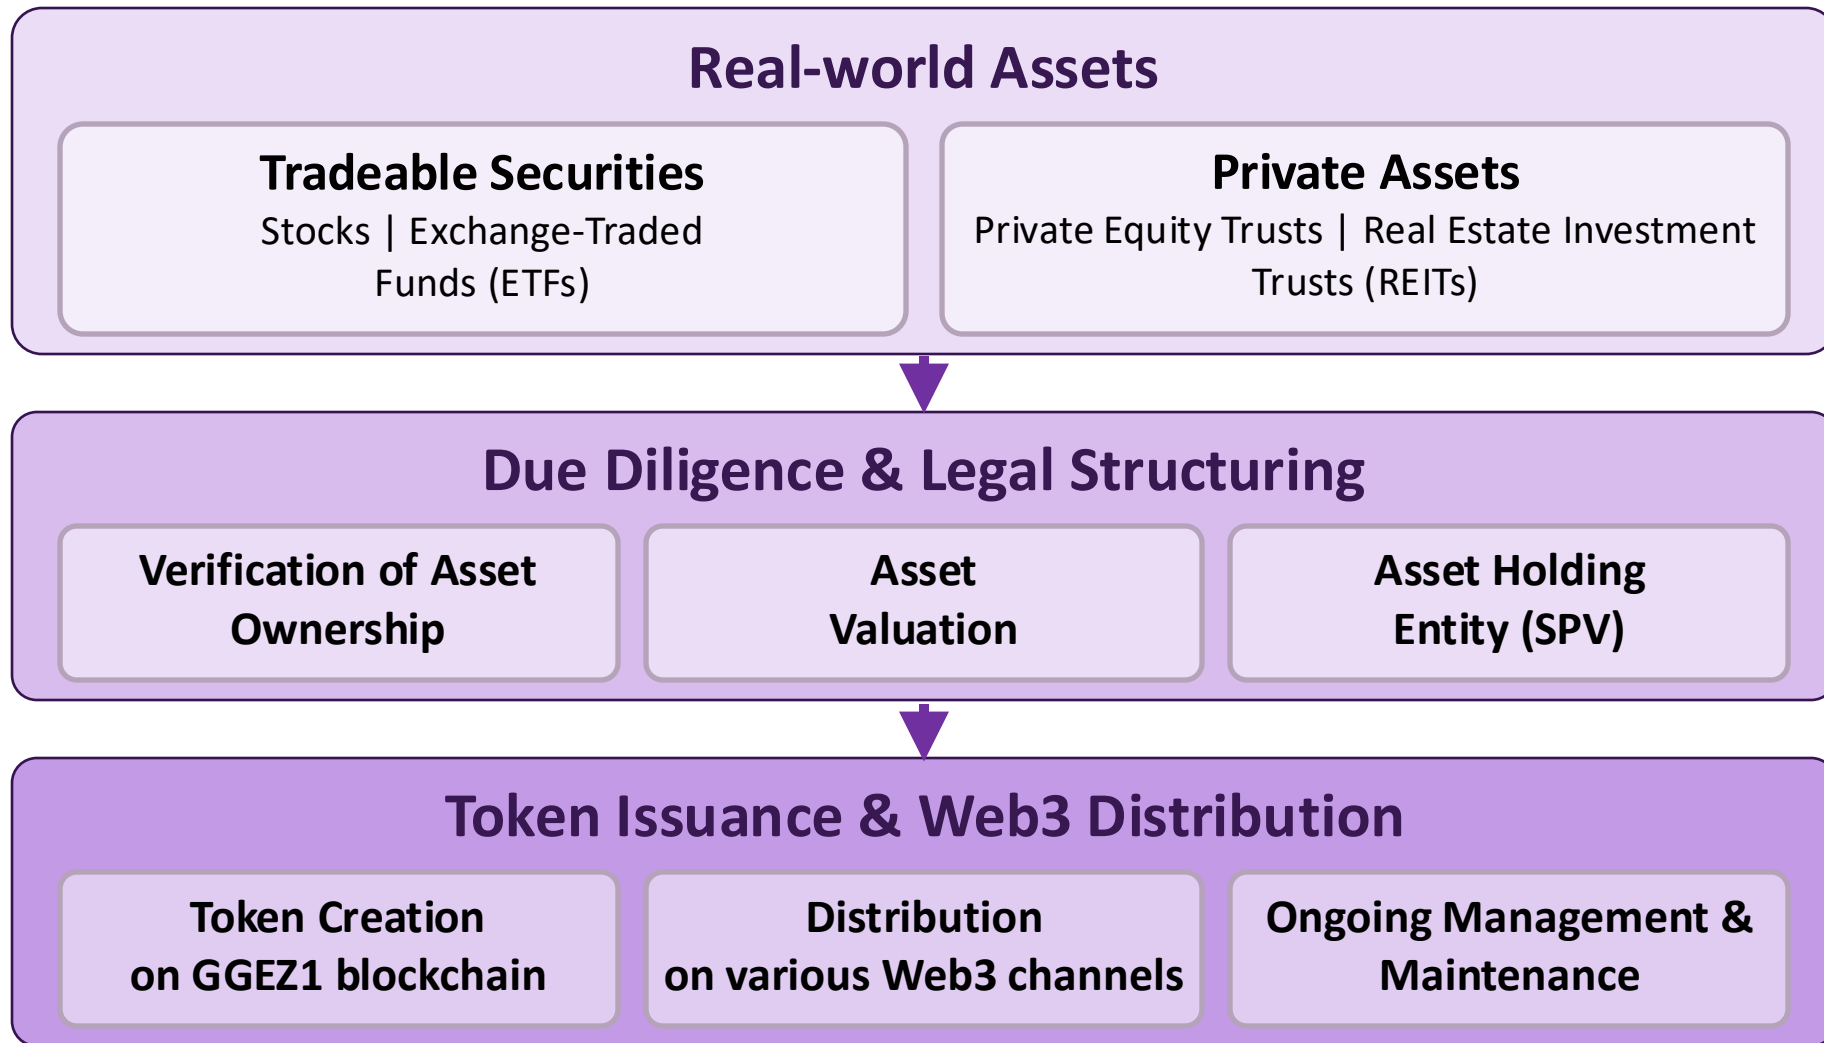

Transactions are confirmed in under **7 seconds**, and fees are **under \$0.01** with a capacity to process **10,000 TPS**.

Tokenization Infrastructure

Live connections with funds trading exchanges to **mint and burn coins** on demand to ensure **supply** aligns with **market conditions**.

Global Sustainability Innovation Launchpad

10 Year Vision: Sustainability at the core of business innovation

Modeling YCombinator, a platform to incubate, accelerate, and finance sustainability startups; integrating Cryptocurrency and Tokenomics into the financial model to enhance funding.

1. Startup Accelerator Program

- Tailored for early-stage startups, this program offers intensive mentorship, technical assistance, and operational support to refine business models, enhance product offerings, and prepare for market expansion.

2. Venture Capital Funding

- Investing in more mature sustainability-focused startups that demonstrate potential for significant environmental impact and commercial success. The fund aims to propel these companies into their growth phases, ensuring they have the capital necessary to scale operations and increase their reach.

3. Global Network Access

- Startups part of ecosystem gain access to a global network of industry experts, potential partners, and investors, enhancing their visibility and connectivity in the international market.

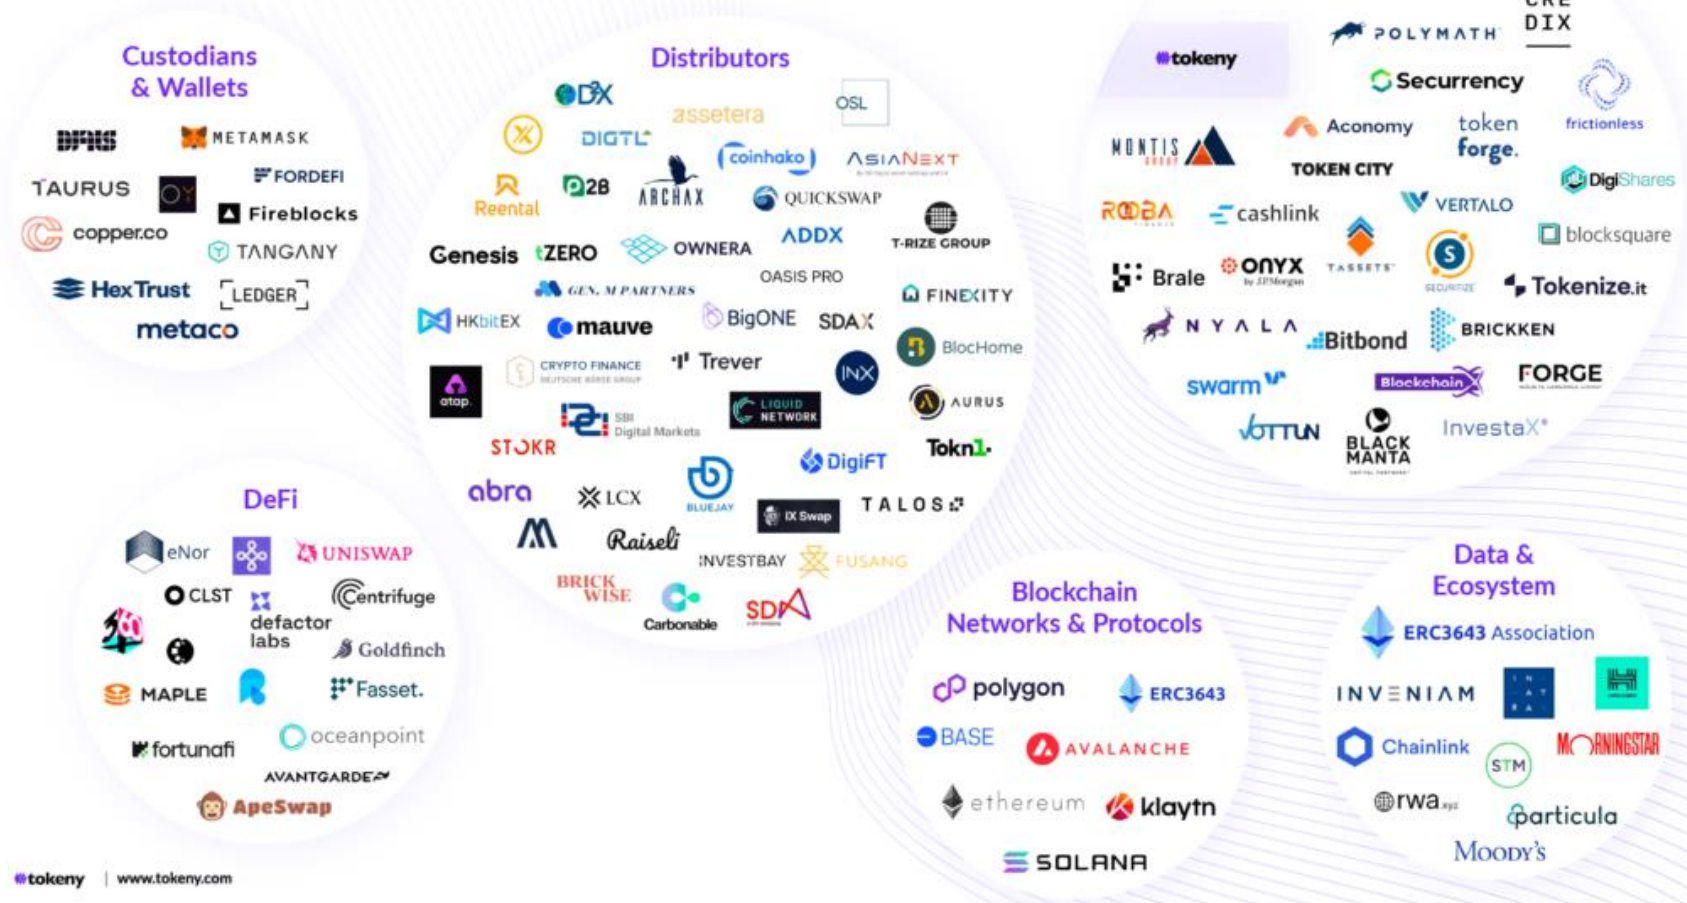

4. Web3 Capital

- Leveraging cryptocurrency to access global capital.

Real World Asset (RWA) Tokenization Ecosystem

xU3o8

Real-World Asset (RWA) Tokenization Ecosystem Map

Crypto to promote and fund projects the world needs.

Geothermal energy, where power plants convert the heat beneath the Earth's crust into electricity.

High-quality carbon removal for your climate strategy via Climeworks' direct air capture and storage (DAC+S) technology.

Hydrogen is the only near-term, scalable, true zero-carbon fuel for aviation.

Renewable drinking water system.
Clean, safe, made entirely off-grid, almost anywhere in the world.

Industrialization of Fonio production in Africa.
Fonio grows in the poorest soils. It doesn't need a lot of water to grow. No matter the climate, it will grow and grow very fast: it can be mature in only two months!

Africa's first green hydrogen plant in Namibia, a 85 MW solar park and a green hydrogen production unit.

GGEZ1 Chain Devathons

Empowering the Next Generation of Web3 Developers

An immersive training and innovation program in partnership with a leading tech institute. Over several months, students will dive into:

- Hands-on coding workshops covering:
- React & Node.js for DApp frontend and backend development
- Real-time frameworks & WebRTC for live interactions
- GameFi mechanics and AI integrations for next-gen DApps

Participants will learn to build AI-powered GameFi applications on the GGEZ1 blockchain, leveraging the platform's scalable L1 infrastructure tailored for sustainability and ReFi innovation. At the end of the program, students will:

- Pitch their DApps to a panel of Web3 leaders
- Demonstrate real working prototypes
- Compete for prizes, recognition, and potential incubation on the GGEZ1 platform

This initiative fuels the GGEZ1 vision of a vibrant developer ecosystem driving sustainable innovation through blockchain.
